# GlowFC CMS for Mobile Apps

Content Management System for GlowFC Mobile Apps

Technology: - Python 2.7, Django Web Framework, Flask-Restless Framework

The image shows a composite screenshot of the GlowFC CMS interface, featuring three main administration panels:

- Glow Mobile Administration (Login Screen):** A simple form with "Username:" and "Password:" fields, and a "Log in" button.
- Glow Mobile Administration (Send Push Messages):** A form for sending push messages, with fields for "Category" (set to "event"), "Title", "Sub Messages", and "Messages", followed by a "Submit" button.
- Glow Mobile Administration (Content Admin):** A dashboard titled "Content Admin" listing various content types with "Add" and "Change" buttons:
  - Auth
  - Groups
  - Users
  - Glowdata
  - Banner Aplikasi
  - Berita
  - Cabang Glow
  - Content Aplikasi

Below these panels, there is a large, semi-transparent background view of the "Select Jadwal Minggu to change" screen, which lists weekly schedules for various sessions across different branches, each with a "Pdt." name next to it.

# Epos Inflight System for Air Asia

Application epos for inflight sales on Air Asia Malaysia

Technology: - Android SDK

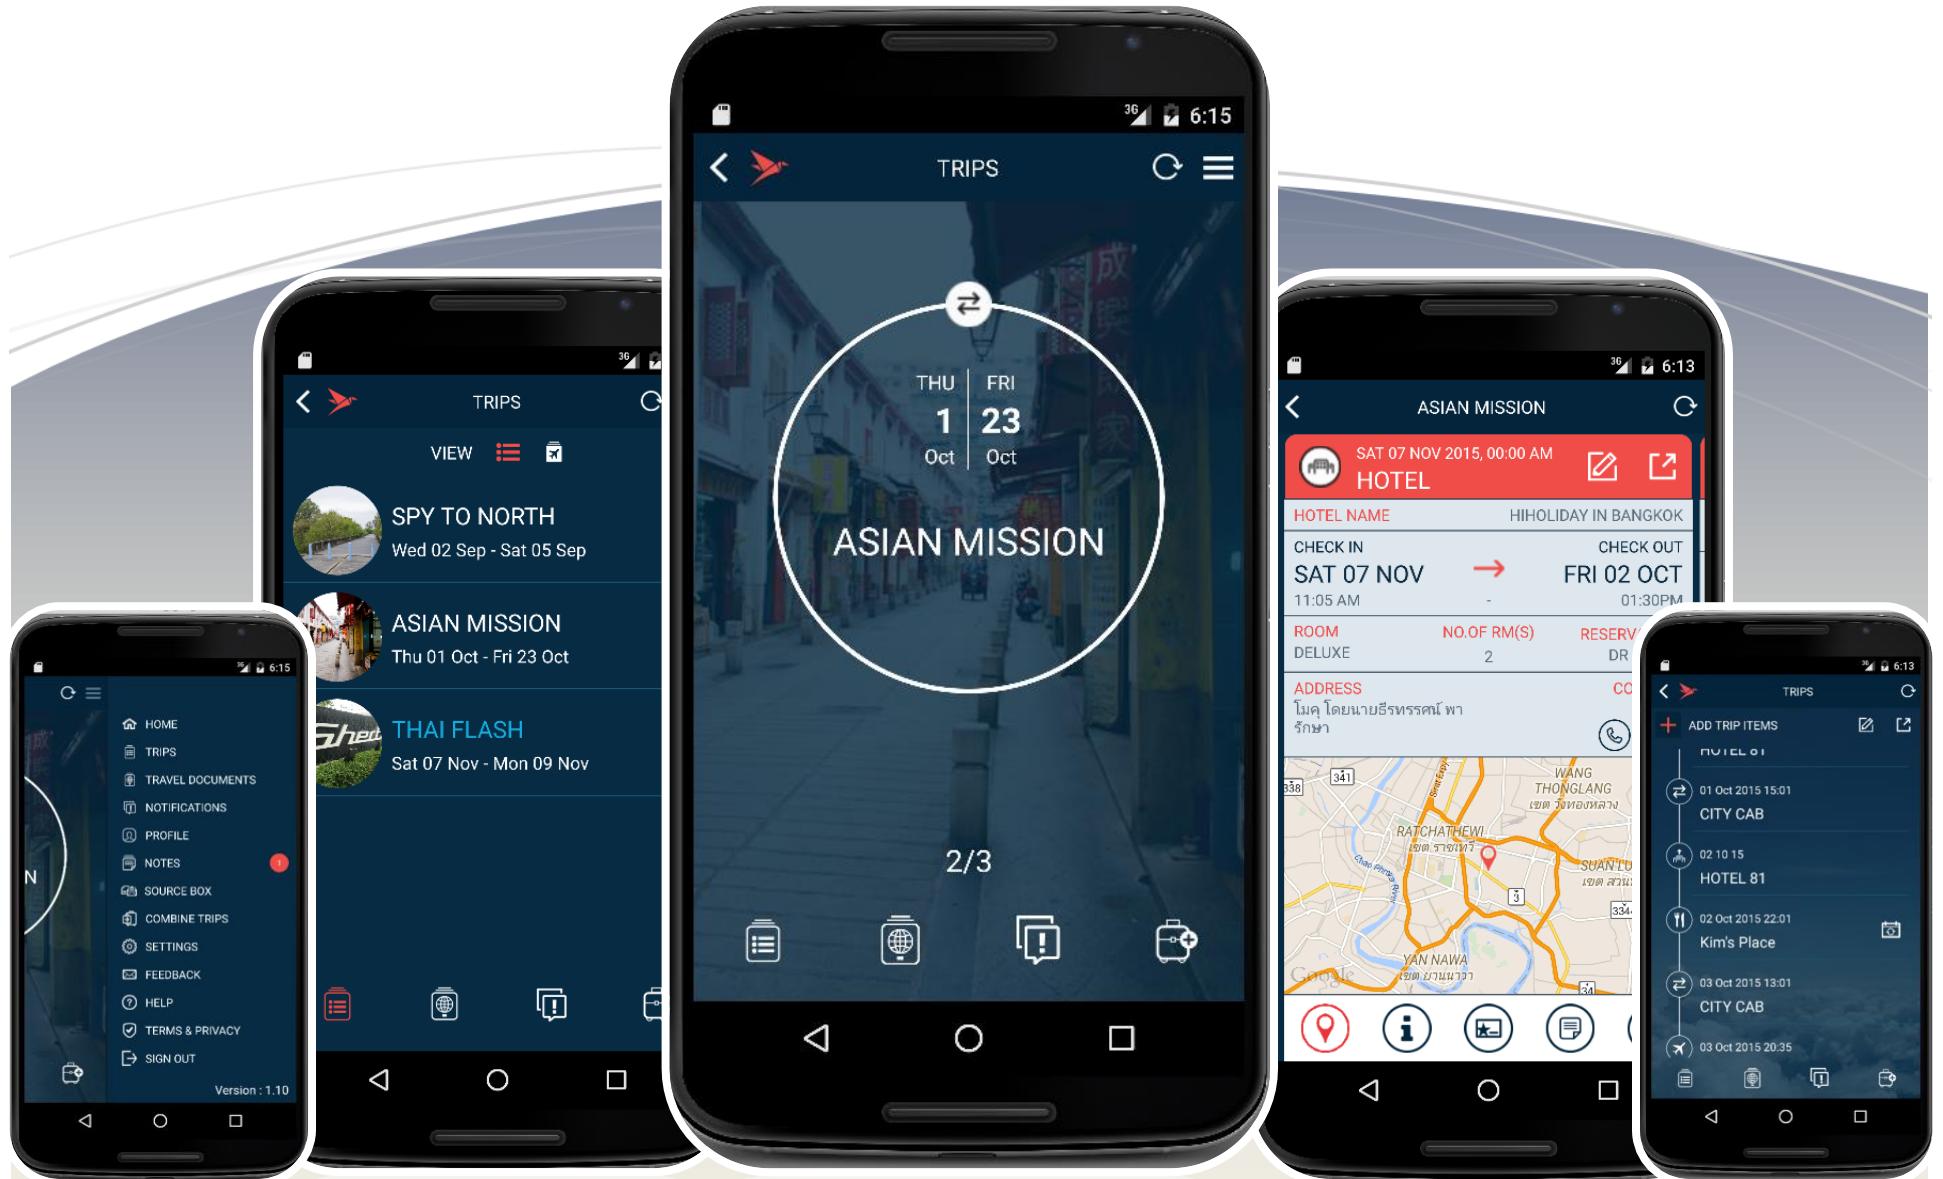

The image displays the Epos Inflight System interface for Air Asia, featuring a red-themed design with white text and icons. The main screen shows flight details: TEST123(SFA), AK112, KUL-CAN. Below this, there are four main categories: Duty Free, Merchandise, Food And Beverages, and a partially visible category at the bottom. The Duty Free section includes a gift icon. The Merchandise section includes an airplane icon. The Food And Beverages section includes a fork and knife icon. On the right side, a detailed view of the Food and Beverage menu is shown, listing items with their descriptions, stock levels, and prices. Each item has a plus and minus button for quantity adjustment.

Category	Item	Description	Stock	Price	Action
Food and Beverage	D3 CFNB1	BANANA CHIPS, 25g	Stock 100	MYR 6.0	+ -
